## Sunday July 23

### The Incredible Spider-Guy!

On July 23<sup>rd</sup>, 53 Model A members and guests congregated at the Gaslight Theatre for an evening of popcorn, bad puns, funny costumes, and, for some of us, an ice cream sundae. We watched the current production, The Incredible Spider-Guy!

Our hero, Billy Baker, a science nerd at Excelsior Community College, becomes The Incredible Spider-Guy after an accident in the laboratory of the famed scientist Dr. Conelius Crocodilious. The head of Max Corp transforms himself into the evil villain, the Green Gremlin, determined to take over Center City (and I am sure his ambition will grow to include the world). He was so grumpy that there was speculation that someone fed him after midnight.

Of course, what would saving the human race be without a hero and heroine finding true love, or at least a smooch or two once the evil villains have been vanquished. It goes without saying, they all lived happily ever after (except perhaps the bad guys Green Gremlin and the newspaper publisher E. Edgar Eagleton.)

## Sunday July 23

As always, “a good time was had by all”. It was a fun show with lots of gags, bad puns, and lame jokes. Just the ingredients for a laugh filled night. Laura and I hope all enjoyed the show as much as we did organizing the event. We wish to thank all who attended. We hope we see you and many more next year for another fun night at the Gaslight Theatre.

## Smart Summer Fashions

By Patti Jones

(Taken from Style Sources, April 1931)

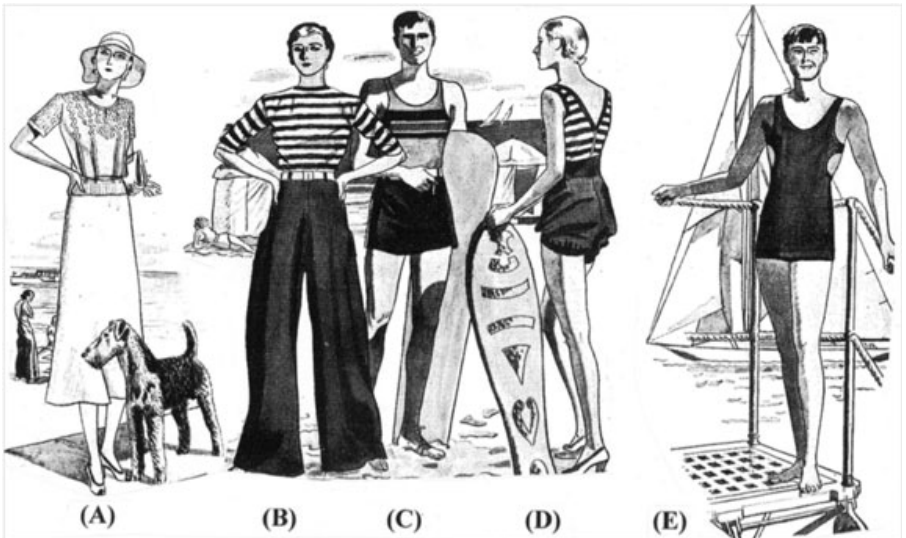

The Bradley Company was a leading knit company during the Model A era. They produced out-of-door wear for the smart fashion conscious Model A'er. Vivid colors were seen in their beach and knitwear. The following could be seen on the shores of the Atlantic:

(A) A sweater blouse in white, with lace on the yoke and sleeves. It came with a matching knit skirt, and could be bought in light blue, mauve gray, and bisque beige. Note the spectator 2-tone shoes and wide brimmed beach hat.

(B & D) These ensembles for the beach were inspired from sailor's uniforms. In navy and white, the knitted one-piece bathing suit (D) has full knickerbockers-style trousers, zipper sun back and square neckline. Jersey is used for the fisherman's style shirt and pajamas in (B). The pajamas fit snugly around the hips and fall straight down to the ground giving the pant leg a distinct flare.

(C) This man's 2 piece suit is made in tan and brown. The suit has a trim cut top and the brief isn't tightly fitted around the legs, as in the other man's swimsuit (E).

(E) This is the common swim suit we normally see being modeled at fashion shows for men. At public pools, these suits were offered for both men and women! It has a "skirt" over the front of the suit to hide a man's "dignity". Being wool knit, the under short fits snugly around the legs for maximum comfort swimming.

# MAFCA NEWS

**2017 National Awards Banquet** — Will be held November 29 through December 3 in Oklahoma City, Oklahoma. Additional details and registration information will be the September/October issue of *The Restorer* magazine, and are now available on the MAFCA website at [www.mafca.com](http://www.mafca.com).

**2018 Membership Renewals** — MAFCA is increasing their annual dues to from \$40 to \$50, beginning with the 2018 membership year. Along with the increase, all memberships will now include online access to *The Restorer* magazine. MAFCA previously charged \$5 extra for online access.

## Jim's technical tip

by Jim Cannon, MAFCA Technical Director

### Adding Oil to Your Differential

Trying to add oil to your differential is not easy. The thick 600W gear oil that we use makes it even harder. Look for one of these "Gear Oil Spouts" in your local auto parts store, Wal-Mart, etc. They screw on to the bottle of 600W oil that you can buy from our Model A parts vendors, and allow you to hold the bottle up above the differential fill hole. Once the oil starts to flow down the tube, you can squeeze the bottle gently to help the thick oil along. It can also help you put oil into the transmission fill hole from under the car (without having to remove the floorboards). When you are done with it, leave the tube on the bottle and the thick oil will drain back in with no mess.

### USE CAR'S EXHAUST TO CLEAN CUSHIONS

Using the exhaust gas of the automobile to clean the upholstery is the accomplishment of a recently invented device. An aluminum attachment is fastened to the exhaust pipe and the engine is allowed to idle. As the exhaust gas passes through this device suction is created at the inlet hole. Collected by a

nozzle, the dust and dirt are drawn through the hose and expelled into the air at the rear of the car. It is made in three models, for cars of different size.

With the car's engine idling, gas from the exhaust creates a vacuum that cleans the cushions
