Fellowship Square Car Show Saturday September 16

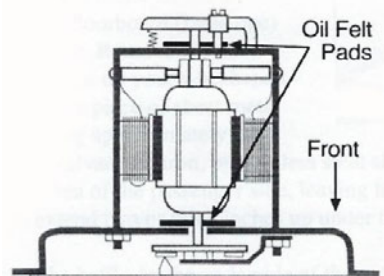

Hello Model A'ers and T'ers,

The fundraiser and official outing was just fantastic. They requested 20 antique vehicles and muscle cars and we ended up with 24 - way to go, club. It was a beautiful day, 95°, Saturday, September 16, 2017. They offered us plenty of bottled water, cookies, live entertainment, and a Sonoran hot dog. The residents and staff just loved viewing the vintage vehicles. They would like us all back next year. Thank you all for your club support in coming out to Fellowship Square.

Submitted by Ray Feierstein/Blue Man/ 😊 😊

Horn Lubrication

Lubricating their horn is one item that some people overlook. There are two felt pads at the armature area of your horn. Put two drops of 3-in-1 type oil on each felt oiler pad about two times a year, and this will keep your horn working. DO NOT OVER OIL.

2017 MAFCA National Tour Pacific Coast Highway September 24 — 29

WE ARE HOME!! The 12 adventurous souls...let's call them the Dedicated Dozen ...all made it home after exciting adventures in California. Some of us had more "adventures" than expected (or needed). And some "adventures" happened before we even crossed into California. See the September newsletter for a list of the Dedicated Dozen.

The Bakersfield Model A people did a great job, especially their "Fix It" team. Also, the Tucson Team supported one another throughout the trip. See the club meeting minutes on page 6 for a brief summary of our "Adventures" (although the summary seems to be missing any mention of a replaced battery...).

Look for more details and additional photos of our adventures in the November newsletter.

Tour to Kitt Peak Sunday October 22

The October outing will be a drive up Kitt Peak and “hobo stew”. So bring a can of vegetables (no beets or spinach) or a salad or a dessert. Please arrive at the library at Ajo and Mission between 8:30 AM and 8:45 AM so we can leave promptly at 9 AM. Tours of the telescopes on the peak will be available for those interested, but they close at 3:00 PM.

Contact: David Ramsower 661-4493.

Davis-Monthan Boneyard Tour

Sunday November 19

The 309th Aerospace Maintenance and Regeneration Group (309 AMARG) – AKA **Boneyard** - Base Entrance is at Craycroft and Golf Links.

Boneyard Tour from 9:00 AM to 11:00 AM – Please plan on allowing enough time to get from the parking area to the point of deployment (final location will be specified in the November newsletter).

Lunch will be immediately following the tour at the **Trident Grill**, 250 S. Craycroft Rd. (at Williams Center)

There will 2 buses driven and narrated by Joe Whaley and our own Frank Pyrdeck, and the attendees should all consider contributing what they're comfortable with to pay for their lunches, since they've so graciously given up their free time on a Sunday. Joe and Frank will be responsible for security of all the attendees, so we'll need be aware of that while we are on the tour.

Short History of the 309th AMARG (Boneyard)

The 309th Aerospace Maintenance and Regeneration Group (309 AMARG) is a one-of-a-kind Defense Department entity, the largest long-term aircraft storage facility in the world, and America's National-Level Air Power Reservoir. The 309 AMARG got its start in 1946 storing WWII bombers and cargo planes. Today AMARG is a major industrial facility encompassing 518-thousand square feet of industrial space and 2,600 acres (4-square miles) of storage space. The facility stores nearly 4,000 aircraft, nearly 7,000 aircraft engines, and more than 516 thousand line items of aircraft production tooling. AMARG has been vital to every major U.S. military operation from the Berlin Airlift to today's ISIS fight.

If you have any questions, please contact Dan Osterman at profdmn@yahoo.com (I will be out of the office through 10/11, so I may not respond until 10/12).

Coil Wire Corrosion

If you buy a new coil wire and coil and connect them properly, they will run great for several years. Over time, however, corrosion builds up in the connections at the coil and at the distributor cap resulting in a poor-running engine. The solution is to coat the ends of the connectors with dielectric grease to seal against moisture and corrosion.
